Here are the files you can download for free. Currently there are three different types of files. First format is the SolidWorks E-drawings. This file format will allow anybody to open the files no matter what software you have installed. E-drawings is the most user friendly format since you don't have to have any special 3-D modeling (CAD) software to look at the files. The second format is the solid model file in \*.igs format. You must have some sort of 3-D modeling (CAD) software to open this file format. If you are planning on doing the machining I have, you will need the \*.igs file. But if you just want to open the file to look at it, you can download the E-drawing. And the last type of files you can download are the blueprints. I don't make blueprints of the solid models I make. So if you need a dimension while working on your project, you will have to reference the model. Later on, I hope to make available other files dealing with my projects...including sketches, setup sheets, programs, etc. Tim at dumpsterCNC made the 1911 solidmodel \*.iges file. Andy at [Helix60@neo.rr.com](mailto:Helix60@neo.rr.com) made the VZ58 \*.iges file.

***My files are free to download, and if you share these files they must remain free!***

Download instructions

*SolidWorks E-drawings: Select the file you wish to download, click Save. To open the file, simply double click the \*.exe file.*

*Solid Model \*.igs File: Select the file you wish to download, click Save. Use your 3-D modeling (CAD) software to open to file after you unzip it.*

*Blueprints: Select the file you wish to download, click Save. Use Adobe to open the file after you unzip it.*

The files below are complete solid models of the AR15/M16 and the 1911 firearms. I made the A2 style AR15 model, and Tom [tom\\_eriksson@hotmail.com](mailto:tom_eriksson@hotmail.com) made the A1 style AR15 as well as the 1911 model. You can download other files Tom has made [here](#). The files below are for visual reference only.

The screenshot shows the CNCGuns website interface. On the left is a sidebar with a list of firearm categories: STI FRAME, SIG P228 FRAME, BERETTA 92FS/M9, RUGER 10/22, AR-45 LOWER, and 22 SILENCER. The main content area has a header with navigation links: CNC --- M16 Lower r..., JMT AR15 lower recei..., CNCGUNSMITHING ~..., and Send an eCard | Win... Below the header, there is a paragraph explaining the file formats available for download. A red banner states: "My files are free to download, and if you share these files they must remain free!". Under the heading "Download instructions", there are three sections: "SolidWorks E-drawings", "Solid Model \*.igs File", and "Blueprints". A "PayPal Donate" button is visible. A "SolidWorks E-drawings" dropdown menu is open, showing a list of files: AR15 Lower Receiver, AR15 A2 Upper Receiver, AR15 A3 Upper Receiver, AR15 A1 De\_handle, AR15 A2 De\_handle, AR10™ Lower Receiver, AK47 Blank, 1911-A1 Frame, STI Frame, SIG P228 Frame, and Beretta 92FS/M9 Frame. Below the dropdown, there is a paragraph about complete solid model files and a link to Tom Eriksson's website. Under the heading "Complete Firearm E-drawings", there is a "Select one..." dropdown menu. At the bottom, another "PayPal Donate" button is shown.

## FOSSCAD: Caleb AR-10 Lower Receiver

This is an AR-10 receiver. It will not work with AR-15 uppers. It is DPMS pattern. Bolt hold open has been deleted on this lower receiver, so any AR-15 lower parts kit can be used to build it out. Ensure any parts kit installed has been rated for AR-10 use.

## FOSSCAD: PM422 Songbird .22LR Pistol

This is a single-shot, single-action 3d-printed pistol chambered in .22LR. It operates under a principle wherein the frame holds the barrel in compression axially and prevents the barrel layers from separating. This allows the barrel to be smaller in diameter than previous, unsupported designs. 100% printed barrels are not intended to have a long service life.

## Computer-aided Design

FOSSCAD does not host any CAD files but the Community does. There are two options for downloading the MegaPack, a torrent and a link for direct download. There is also a photo album with pictures of the new and upgraded items introduced in the latest official release.
